Dear Potten End Primary School

Thank you for choosing to sponsor our puppies in training. Please find enclosed your sponsorship pack.

With no government funding Medical Detection Dogs rely heavily on the generosity of people like you. By sponsoring our puppies your donation supports their best possible care and training so your support is really valued.

Puppies live with volunteer foster families during their training and your contribution will help pay for food, treats, toys, leads, collars, bedding, health care and vet bills. These dogs will go on to help change the lives of many people affected by life-threatening health conditions including diabetes, Addison's disease and nut allergies.

We hope you enjoy reading the updates you receive and look forward to inviting you to our Training Centre at Great Horwood during the course of your sponsorship.

On behalf of everyone at Medical Detection Dogs – thank you.

Eve Cortazzi
Puppy Sponsorship Co-ordinator
