

Big Boned Dogs

By Scott Packer

There are reports coming in that amazingly, a skilled dog has discovered a dinosaur bone! All the witnesses can't stop thinking about the bone and the dog.

The citizens are refusing to get the picture out of their minds. The owners were thrilled to see that they have brought the right dog with the right sense of smell.

There is more news about a puppy that found an ENORMOUS bone. But this time the residents are wondering how such a small dog could carry such a big bone. Well if you look at this picture here you can see that he is clenching the smallest bit with his jaw (most people were admiring the puppy at that time). People are unsure how these two dogs could find such big bones in Potten End.

There are suspicions that dinosaurs could have been in Potten End. Some people reported on seeing one pretty big dog taking a stroll with some people and the dog started to dig and hauled out a humungous bone. And the witnesses said they were taking a walk and saw a dog have a big bone in its mouth AND they said they were in Potten End. We also have some quotes from the owners and this is what they said: "I'm so proud of him! We were forced to give him doggy treats" and "My jaw dropped when he found that bone". The owners of the puppy said "I can't stop saying 'Good boy!'" and "I'm SO proud of him. So proud I let him keep the bone!".

We eagerly await more stories about unusual discoveries in the small village of Potten End.
