

Super Squares

For this challenge I would like you to investigate a square.
How many different facts can you tell me about a square?
There are a lot more things to investigate than you might initially think.

Using diagrams to explain your ideas will be really useful. You might also want to create some squares that you can fold to investigate different ideas.

Super challenge 1: Can you list a square number of facts?

Super challenge 2: Can you list any facts that nobody else in KS2 think of?

Return your entry to Mrs
Stroud by Monday 21st
September
